
BIOGRAPHICAL SKETCH

NAME: **Daniel Teixeira Lopes**

ORCID: <https://orcid.org/0009-0009-4963-0920>

POSITION TITLE: MSc. Student

EDUCATION/TRAINING

INSTITUTION AND LOCATION	DEGREE	GRADE	COMPLETION DATE	FIELD OF STUDY
Polytechnic Institute of Bragança, Portugal	BSc	16	06/22	Biomedical Science
University of Aveiro, Aveiro, Portugal	MSc	-	Ongoing	Molecular and Cellular Biology

A. Personal Statement

Daniel Lopes completed his degree in Biomedical Laboratory Sciences in June 2022. During his bachelor's final project, he had the opportunity to study and evaluate the ABO blood groups and susceptibility to COVID-19, under the guidance of Doctor Josiana Vaz, having obtained the classification of 19 values (Best average grade in Laboratory Biomedical Sciences Research II). In the last year of his bachelor's, he did an internship in haematology, immunochemistry, microbiology and transfusion sciences in the clinical pathology service, as well as histotechnology, immunohistochemistry and cytopathology in the pathological anatomy service at Santa Luzia Hospital. This experience drew his attention for the use of molecular techniques and clinical challenges.

Subsequently, he engaged in the Master Course in Molecular and Cellular Biology. He is currently working on his master's thesis at Instituto de Investigação e Inovação em Saúde of the University of Porto (i3S). His dissertation focuses on understanding and evaluating the efficacy of immunotherapies in pancreatic ductal adenocarcinoma (PDAC) patients with impaired Rab27a expression, under the supervision of Doctor Sónia Melo.

B. Communications

Poster presentation

2024 MSc Open Day - Decipher the Network of EV Messages in Pancreatic Cancer to Expose Novel Therapeutic Strategies

C. Training

2023 Advanced course in laboratory animal science, accredited by FELASA (A,B and D functions)
